"From big to small containers, simple!"

"THE GRAVIFILL PORTAL FILLER"

Clean, Safe & Ergonomic Filling for large Containers

The **Portal Filler** is a **heavy-duty, stainless steel filling solution** tailored for industrial environments requiring **accurate, ergonomic, and contamination-free** filling. Designed to handle IBCs, 200L drums, and other large-format containers, it features an overhead portal structure with a guided lance system that enables under-level filling—ideal for foaming, hazardous, or sensitive liquids.

"ENGINEERED WITH YOUR NEEDS IN MIND"

"UNDER LEVEL-FILLING"

- Eliminates foam and splash risks
- Contamination control
- Reduces exposure to fumes and spillage

"ERGONOMIC COMFORT"

The machine is easy to move, allowing products to be filled directly in place in different containers

"HEAVY DUTY FILLING WITHOUT COMPROMISE"

"STAINLESS STEEL FRAME"

- Hygienic
- Corrosion-resistant
- Long-term use

"HIGH SPEED, HIGH PRECISION"

Reaching filling speeds of up to **5 liters/seconds**, with unparalleled accuracy at **0,5%**

"MINIMAL OPERATOR TRAINING"

- Simple interface with joystick or push-button controls
- Hands-free operation
